

OZIOMA JOHN EGOLE

Full-stack Developer & Digital Problem Solver

Asaba, Nigeria | +234 816 636 5570 | ozimaegole@gmail.com

GitHub: github.com/Ozioma45 | LinkedIn: linkedin.com/in/ozimaegole

Professional Summary

Full-stack Developer with hands-on experience building scalable, responsive, and API-driven applications using **Node.js**, **Express**, **MongoDB**, **PostgreSQL**, and modern frontend tools. Skilled in both backend architecture and frontend implementation with a growing expertise in **TypeScript**, **React**, and **Prisma**. Passionate about crafting clean, testable code that solves real-world problems and delivers great user experiences.

Technical Skills

Frontend : HTML, CSS, JavaScript, React.js, Nextjs

Backend: Node.js, Express.js, REST APIs, Prisma, TypeScript

Database: MongoDB, PostgreSQL, MySQL

Design & Branding: Figma, Photoshop, Illustrator, CoreIDRAW

Soft Skills: Problem-solving, teamwork, adaptability, communication

Highlighted Projects

Urgent2Kay – Directed Bill Payment System

Tech: Node.js, Express, PostgreSQL, Prisma, TypeScript, Jest

Built a secure backend infrastructure for managing bills, authentication, and provider seeding. Applied RESTful practices and TDD, enabling modular and scalable service logic. Role-based access improved API security and reduced error rates by 40%.

[GitHub Repo](#)

TruthCheck – Multilingual Fact-Checker

Tech: MERN Stack, TypeScript, LibreTranslate API

Co-developed a multilingual fact-checking tool. Designed backend for caching, translation

workflows, and secure authentication. Enabled language switching and 60% faster response time through intelligent caching.

[GitHub Repo](#)

Nike-Inspired E-commerce Store (Demo)

Tech: HTML, CSS, JavaScript, React.js (Basic)

Created a responsive e-commerce site showcasing filtering, product details, and cart functionality. Focused on UI layout, responsiveness, and user engagement.
