Gotedo Backend Internship Program

RE: Backend Engineer

Dear Hiring Manager,

I'm reaching out to express my interest in the Backend Internship program at Gotedo. I've been learning tech on my own for about 2 years and 3 months. It's been a solo journey without any mentors or peers to guide me. I've tried connecting with people online, but everyone seems busy with their own things.

I'm not just in it for the money. In fact, I'm okay if it's an unpaid internship. My genuine enthusiasm for technology fuels my drive, and it's frustrating to encounter obstacles in my professional growth due to a shortage of practical experience. Your internship looks like the chance I need to break through these barriers and grow.

I believe being part of Gotedo's team, in an intern, will provide the learning environment I've been missing. I'm ready to work hard and learn from experienced professionals like those at Gotedo. I'm not just looking for a job; I'm looking for a chance to step up and learn in a supportive setting.

Please review my enclosed resume for additional details. I look forward to hearing from you. Thank you for your time and consideration.

Sincerely,  
Ozioma Egole
